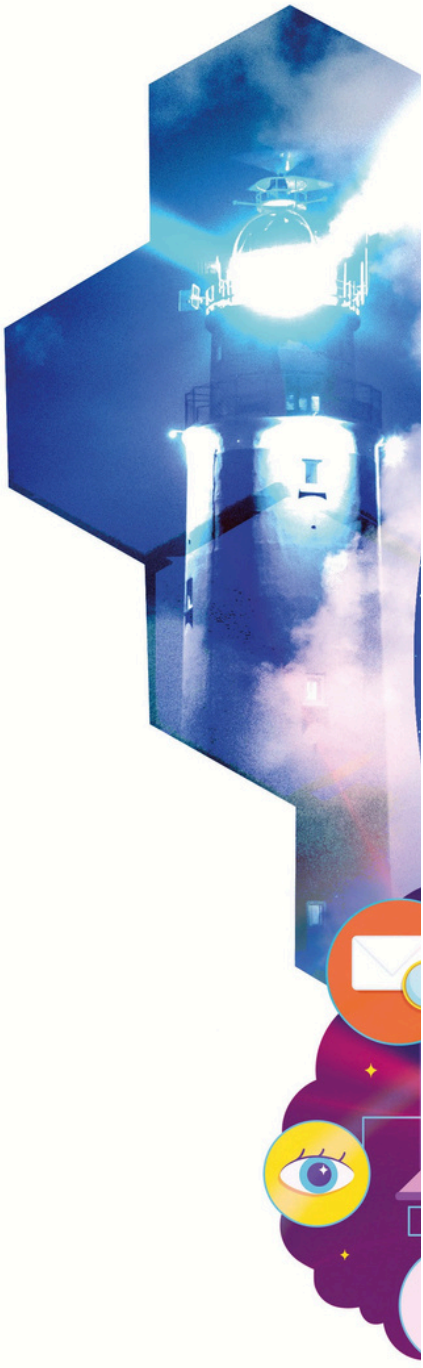
ABOUT US

Shaping the future of cloud technologies and cyber security



METCLOUD is one of the UK's leading providers of cybersecurity and cloud computing technologies.

Our experienced team provides next-generation solutions that help businesses remain secure, effective & efficient in today's economy. We understand the impact organisations face with ever-evolving cybersecurity attacks and work hard to protect their data security, ensuring seamless connectivity to facilitate effective collaboration across any business.

Our multi-award-winning team of experts are committed to developing solutions that are specifically suited for the unique needs of any business with a people-first approach.

It is our mission to be the global brand of choice for next-generation cyber secure cloud services for both earth & space-bound tech.

Visit METCLOUD.com or call
0121 227 0730 to find out more.

CYBERSECURITY

Protecting your business anywhere

With the global cost of cybercrime predicted to top US$10.5 trillion by 2025, it is more lucrative than drug trafficking.

Hackers are becoming increasingly sophisticated in their attacks, and have moved on from only targeting large organisations. SMEs make up 99.8% of the UK economy and they are particularly vulnerable to cyberattacks for various reasons. While targeting small companies may not carry the same level of notoriety as high-profile, multinational conglomerates, the reality is that cyber-attacks against small companies are far more lucrative for less effort and risk.

While many SMEs do not have the resources to hire a dedicated in-house cybersecurity team, there are still options available. METCLOUD's team of experts have immense experience in providing fit-for-function cybersecurity and cloud solutions that are scalable in accordance with business needs.

We support businesses across a range of sectors and our experienced, reliable team allow us to provide high tech solutions making METCLOUD a trusted and resilient partner for businesses of all sizes.

Visit METCLOUD.com or call 0121 227 0730 to find out more.

Award-winning cybersecurity expertise

METCLOUD is proud to be an award-winning business, below are some of the titles we have been awarded in recent years.

CLOUD INNOVATION PROVIDER OF THE YEAR
UK IT Industry Awards

CYBERSECURITY FIRM OF THE YEAR
Fintech Awards

TOP 5 BEST SECURITY COMPANIES TO WATCH
The Silicon Review

MOST SECURE CYBER HYBRID CLOUD PLATFORM
The AI Cyber Security Awards

BEST SECURE CLOUD PLATFORM PROVIDER
Technology Innovator Awards

OUR FUTURE

Leading the way through innovation

METCLOUD is also developing a world-leading cybersecurity capability that harnesses Artificial Intelligence and Deep Learning.

This innovative, next-generation project is being delivered in partnership with Birmingham City University as part of the #KnowledgeTransferPartnership program.

The cyber threat landscape is expanding exponentially as the world becomes increasingly connected.

This significant growth in threats is overwhelming traditional methods of security and therefore artificial Intelligence is fast emerging as an essential component in the fight against cybercrime. These challenges underscore the need for better ways to stem the tide of cyber-breaches. Artificial intelligence is particularly well suited to finding patterns in huge amounts of data or detecting threats within milliseconds.

METCLOUD aims to be a pioneer in the field of cybersecurity developing next generation technological capabilities.
